

## Bill of Materials – Paddling Pram 9

*Note: This is the minimum material needed plus a 15% waste factor. Some builders will require more wood flour and resin than others.*

<u>Plywood</u> : 4' x 8' [122 x 244] , 4mm	3 each
<u>Epoxy Resin</u> (and hardener):	2.5 gallons [9.5 Liters]
<u>Fiberglass Cloth</u> 6 ounce, 38" wide [200 g/m <sup>2</sup> , 97 cm]	14 yards (13 M)
<u>Wood Flour</u> :	2 quarts

Additional material will be required for gunwales, seating, etc.

**Note: Amounts listed are minimum quantities. It may be more economical to purchase epoxy and fiberglass in slightly greater quantities. Check with your vendor for pricing details.**

**If only applying fiberglass tape to all seams, in place of fiberglass cloth, use:**

<u>Fiberglass Tape</u> ,     6 ounce, 4" [200 g/m <sup>2</sup> , 10cm]	50 yards (46 M)
